

# ABSTRACT

**NAME:** SUNNYIA TIRMIZI      **ADVISOR NAME:** MS, RAFIA BAIG

**YEAR:** 2007-2008      **DEPARTMENT:** CLOTHING AND TEXTILE

## **Title:**

“Awareness regarding skin allergy occurred by wearing jewelry, among the students of Ra’ana Liaquat Ali Khan Government College of Home Economics.”

## **Objectives:**

- To find out the material of jewelry preferred by the students of Home Economics.
- To assess the frequency and awareness regarding skin allergy among the students of Home Economics College.

## **Methodology:**

This research was conducted at Ra’ana Liaquat Ali Khan Government College of Home Economics Karachi. The subjects for this research were students of Intermediate, Bachelors and Masters. A convenient sample was taken randomly by a draw, one section of each grade i.e. one section of first year, one section of second year, BSc part I, BSc part II, MSC previous and one from MSc final. The data was collected through a self administrated questionnaire. The data was entered and analyzed on the statistical package for social sciences (SPSS version 13.0).
